SUMMARY

I'm an entry-level developer with a background in land administration and a self-taught foundation in software development. I've built and deployed real-world applications that reflect a strong understanding of both user experience and system logic. My journey has been shaped by curiosity, adaptability, and a hands-on approach to learning. These qualities make me ready to contribute across the stack, solve real problems, and grow within any dynamic and impact-driven team.

WORK HISTORY

Website Developer and Maintenance

2025 June - PRESENT

Aupair Petal, Tanzania (www.aupairpetal.com)

Designed and launched a responsive company website using modern web technologies, ensuring clean layout and smooth navigation across devices. Implemented a basic backend for content updates and continue to handle regular maintenance, performance checks, and usability improvements based on team needs and client feedback.

Website Developer and Maintenance

2024 September - PRESENT

Chantnchroma, Nairobi, Kenya (www.chantnchroma.art)

Led the initial development and deployment of the company's website, with ongoing maintenance and performance updates. Currently reworking the site as part of a brand refresh to align with new goals, adding updated content and features progressively. The site remains live at various stages of development, reflecting the evolving design and structure.

Website Developer and Maintenance

2025 July - PRESENT

Elevonic lifts, Nairobi, Kenya

Spearheading a full relaunch to align with the company's updated branding, service offerings, and upcoming expansion goals. Responsible for redesigning site structure, enhancing user experience, and preparing scalable features to support future growth and client engagement.
